

Sage Nonprofit Solutions

What's New with Sage 100 Fund Accounting 11.4 (functionality released May 17, 2012, 2012)

Sage Fund Accounting's latest update is here! The v11.4 release is focused on enhancements to help save time, simplify your processes, and share information about product requests and upcoming changes. For additional information regarding version 11.4, please view the recorded What's New webcast by [clicking here](#).

More Options for Payroll Processing

Payroll Link is now available! HR users who process payroll outside of Sage 100 Fund Accounting can now export data directly from HR to their preferred third-party application.

New Enhancement Request Portal

We are pleased to announce the introduction of the Sage Fund Accounting Ideas Portal. Here you will be able to submit product requests, view existing ideas, and vote and comment on other users' requests. You can also track enhancement requests to see which are currently being planned for development and release. Just go to Help>Submit Product Enhancement to share your feedback!

Streamlined End-of-Year Processes

Eliminate hours of work and manual entry with our new auto-close encumbrance feature. This new function allows you to quickly review and liquidate encumbrances so they do not carry forward into the next calendar or fiscal year.

Simplified Set-Up for Product Training

Starting with v11.4, the MIPT training database will be automatically provided during installation. No need to worry about downloading and installing MIPT at the beginning of class!
